

# CUTTING EDGE

The Cutting Edge 2017 team and Acta Chimica Slovenica are pleased to announce a special edition issue!

Driven by the enthusiasm and positive feedbacks received after the successful first Cutting Edge conference in September 2015, we are now announcing the next step in our quest to widen the field of research to undergraduate, graduate and postgraduate students in chemistry. We will bring together young researchers once again in **September 2017** for an unforgettable day with our esteemed professors as well as prominent Slovene and foreign scientists. Furthermore, we are giving our junior participants the opportunity to **submit and publish their own scientific article**.

We are proud to announce that the Cutting Edge team has joined forces with the **Slovenian Chemical Society** that has been publishing the journal **Acta Chimica Slovenica** since 1954. Together we are preparing a **thematic issue** dedicated to the research of students and junior researchers within the fields of chemical and biochemical sciences. This regular edition will be published in September 2017 and handed to the participants at the **Cutting Edge 2017** conference.

Young scientists are invited to write a short communication (max. 2500 words) according to the guidelines available on <http://www.chem-soc.si/acta-chimica-slovenica>. The authors should clearly indicate "For Cutting Edge 2017" under the authors' affiliation in the manuscript. All received manuscripts will undergo a peer-review process. The authors of the published manuscripts will receive a **free registration** and will be given priority for the oral presentation at the **Cutting Edge 2017** conference.

Call for papers is now open and closes on Wednesday, the 31th of August 2016.  
Best of luck with your research and see you at Cutting Edge 2017!
